

SC FAASTeam presents:

# **Pilot Proficiency and Wings and Non-Tower Airport Flight Operations**

We will be introducing the Wings program Topic of the Quarter and we will show how Wings participation puts pilots on the path to proficiency. Next, we will review the Advisory Circular (AC) AC 90-66B that examines regulatory requirements, recommended operations, and communication procedures for operating at an airport without a control tower.

While ACs are not regulatory, the FAA believes that the observance of a standard traffic pattern and use of CTAF procedures - as outlined and detailed in this AC - will improve the safety and efficiency of operations at non-towered airports.

**Directions:** Seminar will be at the Conference Room in the Beaufort Executive Terminal Building.

ALL STATE AND LOCAL COVID-19 PROTOCOLS WILL BE FOLLOWED

**A message from the National FAASTeam Manager**
